

REMARKS/ARGUMENTS

The foregoing amendment to the specification corrects a typographical error in one of the mathematical formulas originally set forth in the present specification. Specifically, formula (5) originally set forth in paragraph [0044] of the specification as:

$$H(f) = \frac{G_{xy}(f)}{G_{xx}(f)}$$

has been replaced with the following corrected formula:

$$H(f) = \frac{G_{xx}(f)}{G_{xy}(f)}$$

Applicant submits that persons skilled in the technology involved here would have readily discerned the error in original formula (5), and would have recognized that the numerator and denominator should be switched in the correct formula.

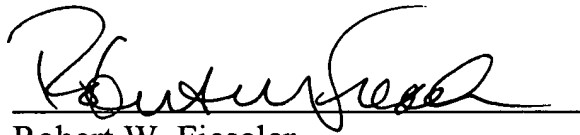

* * * * *

In view of the foregoing amendments and remarks, applicant submits that the above foregoing amendment should be entered as it corrects a conspicuous error one of the mathematical formulas originally set forth in the present specification and does not introduce any new matter into the present application. If necessary, applicant requests that a Supplemental Notice of Allowability be issued to formally enter the present amendment.

Since the present amendment to the specification does not involve consideration of any new substantive issues, applicants request consideration and entry of the present after-allowance amendment and remarks. The Examiner is invited to telephone the applicant's undersigned attorney at (312) 775-8123 if any unresolved matters remain.

This Amendment After Allowance is being submitted concurrently with the issue fee transmittal (Form PTOL-85 (Rev. 07/05), Part B - Fee(s) Transmittal). Please charge any fees incurred in connection with this submission to Deposit Account No. 13-0017.

Respectfully submitted,

Robert W. Fieseler
